2008 Enhancement Ballot

Again, we would like your input! MVLS and SALS site-contacts are invited to rate enhancements submitted by Polaris users nationwide, and we will compile results for Michele Largeteau, who is the MVLS/SALS voting representative to the nationwide Polaris Users Group. You are encouraged to talk with other staff in evaluating the items. User input is important to Polaris and most improvements to the Polaris system come from user enhancement requests.

Like last year, the votes will be by category and not individual requests

Please view enhancements online at:

http://www.polarislibrary.com/extranet2/ Click on Customers → Polaris Users Group → PUG 2008 Enhancements Lists

Your user ID and password are the same as for the Polaris Extranet: see
http://japroject.sals.edu/Polaris_Help/PLS_Information/GISExtranet.html

Caveats:
- If you don't use a category (e.g., Cataloging), don't vote in it.
- If you don't understand an item, don't vote for it.
- We will not be voting on Serials, because we have not yet used it.

Please list your **TOP Four (4)** category choices *by number* in each of the categories listed below. All choices are given equal weight, there is no need to rank.

ACQ	CATALOGING	CIRC/PATRON SERVICES	PAC	SYS ADMIN / REPORTS

Please return your ballot to Jennifer Ferriss by courier (SAL), fax: 518 587-5589 or email jferriss@sals.edu no later than Tuesday September 2nd
