### DESCRIPTION OF WORK PERFORMED

- ☒ New Driveway / Road / Parking Lot
- ☐ Resurface 3 in #3 BINDER  
1 1/2 in #6 ASPHALT
- ☐ Rip Out Full ☒ Partial
- ☐ Sealcoating

ACCREDITED  
BUSINESS

A+

See our reviews on

Angie's list.

We hereby submit specifications and estimates for paving as follows:

- 1) Remove approximately 11,700 sq ft of Regrade subbase
- 2) Compact & INSTALL crusher run subbase needed  
for grade & compact area
- 3) INSTALL 3 in #3 Binder compacted
- 4) INSTALL 1 1/2 in #6 Asphalt compacted

### •MUST STAY OFF DRIVEWAY FOR 5 DAYS AFTER INSTALLATION

#### \* This price includes all discounts and coupons \*

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs will be done only upon a written change order. The costs will become an extra charge over and above the estimate. All elements of this agreement are contingent upon strikes, accidents or delays beyond our control. The estimate does not include material price increase, or additional labor and materials which may be required should unforeseen problems arise after the work has started.

You, the buyer, may cancel this transaction at any time prior to midnight of the third business day after the date of this transaction. Cancellation must be done in writing.

We Propose hereby to furnish material and labor—complete in accordance with above specifications for the sum of:

\$ 54,740 dollars (\$ \_\_\_\_\_)

Payment due upon completion of the job. Please note that contracts, which are not accepted within thirty (30) days, are subject to a change in price, as the price of blacktop and fuel tend to fluctuate. We will gladly accept credit cards, however, the price of this contract will increase to an additional 3.5%.

(Property Owner)

\* Warranty information is stated on the back of this contract

\* Sealcoat is an additional charge and is not included in the price of this contract

\* As stated on the back, we do try our best, but do not guarantee water pitch puddles

\* As stated on the back, we do not guarantee tire marks or small indents in the blacktop caused by turning your steering wheel

### **WHAT TO EXPECT AFTER SIGNING OUR CONTRACT:**

- 1.) We will contact Digsafe to mark the utilities. Please note that private utilities such as sprinklers will not be marked. Please have them marked before we prep the driveway.
- 2.) Two separate crews will be involved in the driveway replacement process.
- 3.) The first crew will be prepping the driveway. This includes removal of existing blacktop, grading the sub-base, the installation and compaction of stone. At this time, you can still use the driveway.
- 4.) The next crew will be installing the new blacktop and compacting. After installation, you must stay off driveway for 5 days.

### **NEW DRIVEWAY/WARRANTY INFO:**

1. ) Your new blacktop is warrantied for two (2) years unless otherwise specified by Contractor with the following exceptions: Acts of God (including tree roots, erosion, sink holes, soft ground conditions, heaving from frost, settling of ground, vegetation, animals, rodents, etc.), snowplows, underground cables, waterlines, depression from foreign objects, turn marks from tires, scuff marks or depressions caused from continuous passing and/or parking in the same locations and indentations caused from commercial or abnormally large vehicles. No guarantee of uniform color or uniform material appearance as we do not make the material. Any repair that needs to be made that is not covered under warranty will be an additional charge

2.) Water pitch and puddles are not guaranteed or covered under warranty, as the Contractor does their best job to resolve issues with water pooling and pitch; some driveway layouts are impossible to resolve these issues. If your driveway appears to hold water, please note that our policy is to let the driveway settle and BDB will make any repairs the following Spring, before the first sealcoat application. Repairs may or may not be an additional charge. If you experience puddling after your driveway is installed, BDB recommends installing a resurface/top coat the following year for an additional charge. We DO NOT warranty any puddling.

3.) You are required to have your new driveway seal coated after one year of installation. BDB likes the new blacktop to experience one Winter season before applying sealer. If the top driveway layer appears to be soft in the Spring, we will urge you to wait for the tar to break down more before sealing. If you choose another contractor to apply sealer, any warranties/guarantees are voided. Seal coat applications are an additional charge and are not included in the price of this contract. First year sealcoat is an important part of maintaining your driveway. Sealcoating is recommended as a bi-yearly maintenance of your driveway.

4.) Your warranty does not cover unsettled ground, soft or spongy ground caused by wet clay or dirt. If your sub-base is clay, we highly recommend a two-course paving. This includes stabilization fabric, a minimum of 8 inches of stone, binder course and a top course. If the sub-base is extremely wet and not suitable to pave in the same day/week as stone installation, our foreman will notify you of this and we recommend the driveway sitting in stone for a minimum of one week. At this time, you can drive on the stone. If wet sub-base and puddling continue to be an issue, BDB will recommend 2 course paving. This includes installing Binder the first year and topping with a Type 6 Asphalt the following year. Additional charges may occur.

5.) When resurfacing existing blacktop or concrete, any noted cracks or problem areas will reappear. We do not guarantee, or warranty driveway resurface work as reflective cracking will occur.

6.) It is very important to be sure not to park abnormally large or commercial vehicles on new asphalt for as long as possible. If you heat your home with oil, we recommend getting oil tanks filled prior to having the new driveway installed.

7.) Tire marks, scuff marks, loose stones or areas that are dug up by turning tires while not in motion on the blacktop are not covered under warranty. It is important that you do not turn your tires on new asphalt while the brake is engaged. This is described in the manual provided after the work is complete. If this damage does occur, most of the time the area will resolve itself. BDB will do it's best to repair these before sealing the following year.

8.) If you have a sprinkler system, it is the homeowner's responsibility to move them 1ft. away from the driveway, before any work is to begin. BDB is not responsible for damaged sprinkler heads, it is recommended to mark them out, prior to starting.

9.) When adding on to an existing driveway, BDB recommends resurfacing the existing asphalt for a smooth, seamless surface. BDB is not responsible for damage to existing asphalt and/or landscaping (this includes concrete sidewalks/aprons) that may occur due to construction.

**I have read and understand the terms and conditions of this proposal and the warranty information.**

**Signature \_\_\_\_\_ Date \_\_\_\_\_**
